Wash Station Pure

Description:

- /// in industrial style
- /// completely handmade
- /// made of blue steel and recycled wood
- /// solid, timeless and puristic
- /// versatile customizable

Our new wash station Pure is completely handmade in a locksmith's shop of our confidence and is a new product development of HNC 2.0.

From a customer request for a wash station in industrial design became the #ProjektPure. Suggestions for improvement, design ideas, praise and blame determine since then the project and should further drive the development. Get involved in this project or follow the further development steps under #ProjektPure.

Facilities and accessories in industrial design are not only in the living area, but also in the hairdressing salon fully in the trend and in their puristic design actually timeless. The industrial look can also be wonderfully combined with different styles.

For the implementation of such a wash station, the following components were selected:

The body is made of blue steel, a bluish shimmering steel. Light, intentional processing traces in and on the material further emphasize the industrial look. The steel is painted matt and thus receives a corrosion protection. The top tray is made from recycled wood and comes from Kolibri, a creative company with a focus on upcycling and our partner for alternative

interior design ideas from our region. The wood with history and character undergoes a surface treatment and is thus protected from moisture. The combination of the materials blue steel and recycled wood skilfully give the wash station the special look. Each wash station is thus unique through the use of both materials.

The wash column is easy to open from behind. Unscrewing the 6 screws by hand gives you free access to all necessary connections.

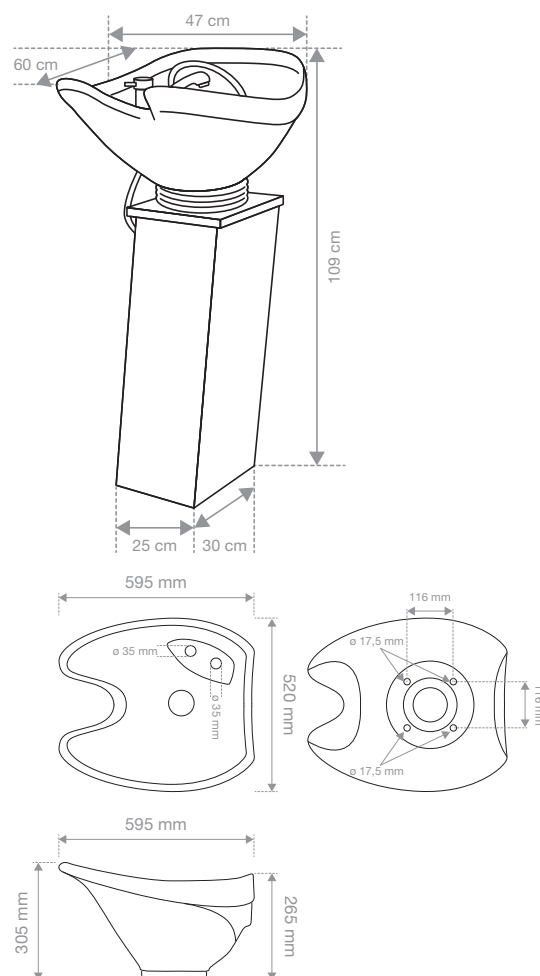

The white long-hair ceramic basin (or optional black) is delivered with the elegant mixer „Zepa“ with drop stop in the basin. The basin is mounted on a tilting mechanism.

Overall a great product for friends of alternative interior design ideas! Each piece is made individually - room for individual ideas!
